

Dudley Newsletter

If you have been to Dudley Park recently, or have taken a drive down Church Street, you are bound to have noticed some significant changes.

Since our last Dudley Park Aquatic Centre update, a number of important steps towards the construction of the new facility have occurred.

Firstly, you will remember that MainPower were installing a new transformer at the side of the driveway to the car park. This was because the old transformer was part of the old outdoor pools building. We are pleased to advise that this job was successfully completed and allowed demolition of the old outdoor pool to begin.

Demolition of the old outdoor pool site was completed within the set timeframes, beginning Monday 10th November and completed by Monday 22nd December. The demolition process occurred without any unforeseen issues and the site is now ready for construction of the new facility to begin.

Construction of the new Dudley Park Aquatic Centre has been given the official green light by Council, and work is due to begin from 12th January with Naylor Love being awarded the construction contract, having met all prequalification and tendering criteria.

It is forecast that the construction of the new site will take around 52 weeks with the official opening of the new Dudley Park Aquatic Centre due to take place in February 2010.

As with any building site, the area will be fenced, however we do ask for your assistance in reminding children about the importance of staying out of the construction site, both during and outside of working hours. Additionally, Naylor Love have asked us to advise you that an increase in medium to heavy vehicle traffic is likely along the roads

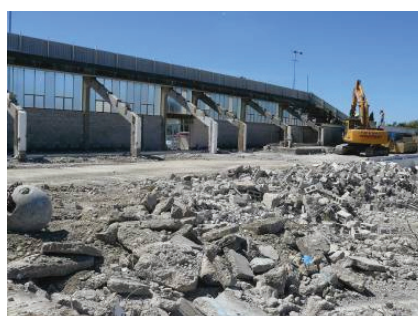

leading to the site during working hours. Deliveries from the north of the site past the school have been restricted.

We will keep you updated on progress, with the next progress newsletter at the end of March. If you have any questions please call either: Simon Hart, Aquatic Facilities Manager on 327 8539 or email simon.hart@wmk.govt.nz.
